

New Hampshire Medicaid Brand Over Generic List

October 1, 2026

Not all generics are preferred. In some instances, the State prefers the multi-source brand name drug over its generic equivalent because the branded drug is more cost effective than its generic counterpart.

Pharmacy providers must enter a DAW code of 9 on the claim to have it correctly priced. If any problems occur during the claim adjudication of Preferred Brands, pharmacy providers must contact Prime's Technical Call Center at: 1-866-664-4511. The call center is available 24 hours, 7 days per week.
